

Viasat PDC/IP Software

This powerful PDC/IP software enables users of Microsoft NT 4.0 and Windows 2000 to use the VDC-400 as a Networking Interface Card (NIC), enabling the seamless integration of existing IP-based software into a point-to-point RF networking environment. In addition, the PDC/IP networking software enables you to build a gateway from the Internet to RF networks by adding a VDC-500 to the IP networking topology. With the addition of a VDC-500 on the LAN, LAN Network users can share data through LAN servers or by communicating directly to the RF user. The PDC/IP networking software is easily configured and, once set up, needs no additional user intervention.

PDC/IP in a Gateway Environment -

PDC/IP Features -

- Easy to use.
- Seamless integration of existing IP application
- Proven reliability of the VDC-400
- Proven robust MIL-STD-188-184 protocol
- VDC-500 Gateway compatible

System Requirements -

- VDC-400
- Laptop with PCMCIA interface
- Windows NT 4.02 or Windows 2000

(NB Windows NT requires a readily available 3rd party Touchstone PCMCIA Cardware product and requires that the VDC is enabled as the only NIC in the laptop)

Rugged Systems is one of Europe's leading suppliers of rugged, mobile computer, display and communications solutions and services. Specialising in applications such as test & measurement, command and control, data acquisition, secure data & computing, TEMPEST and ultra-reliable message transfer over noisy tactical communication channels. The company strives to be innovative and provide cost effective solutions, through many years of knowledge and experience
